Corona-Virus

Dear patients,

The past weeks have been challenging and we like you are forced to cope with new regulations and changes regarding the Corona-Virus epidemic every day.

Our main goal is to prevent you and our staff from getting infected with Covid-19 while still offering you our medical support!

To be able to keep our practice open we are forced to stick to several new regulations:

We are not allowed to do operations, that are not urgent, or general examinations anymore. This might mean that we have to cancel your scheduled surgery or move your annual check up to a later time this year. Our team will get in touch with you to organize a new appointment for you. We kindly ask for your understanding! Please know that we will see you as soon as we can!

We will continue to do the necessary pregnancy checkups and we are open for any emergency consultations!

As far as data shows today pregnancy is not a risk factor for Covid-19. Pregnant women do not seem to get faster infected or in more need of hospital care/ ICU treatment. From the data in China and Italy there does not seem to be a vertical transmission to the baby.

We have a special hotline for your questions regarding Covid-19 in your pregnancy. Please call: 043 819 3787

Please continue to support us in our work by

- Coming to your appointments alone (without partner/children)
- Stick to our recommendations in our practice
- Refraining from coming if you show symptoms like fever/cough. In that case please call us first! **043 819 3787**

We thank you for your understanding and support!

Please stay safe, stay healthy!

Together we will make it through this crisis!

Juliette Schmid-Lossberg, Gudrun Mehring, Bettina von Seefried and the gynhealth team
